Kakovost izdelkov:

Velja poudariti, da so izdelki iz te ponudbe zelo kakovostni. Na primer: izdelki označeni kot PP (polipropilen) in PUR (poliuretani) so odporni na udarce, fleksibilni in dolgotrajni. Tudi TPU (termoplastični polimer – gumi podoben elastični material), iz katerega so izdelani stožci, je veliko boljši od bolj togih PVC-materialov, še posebej pri nizkih temperaturah.

Vse reflektivne folije za obnovitev je možno dokupiti posebej.
